PORTRAIT OF MMQ

Our Profile

On the initiative of the *Fédération québécoise des municipalités* (FQM), *La Mutuelle des municipalités du Québec* (MMQ) was created in 2003 under the *Municipal Code of Québec* and the *Cities and Towns Act* to meet the specific property and casualty insurance needs of municipalities. The MMQ is wholly-owned by the municipalities, Regional County Municipalities (RCMs) and intermunicipal boards that constitute its mutual members.

The MMQ was born out of Québec municipal sector's desire to guarantee itself comprehensive and diversified long-term insurance. The MMQ distinguishes itself by its exclusive risk management program that results in fewer claims and more stable premiums.

Our Mission

Enable Québec municipalities, RCMs and intermunicipal boards to take advantage of the mutual principle and support them in researching and implementing risk management measures so that, by reducing the risks associated with their activities, they can benefit from privileged access to insurance products adapted to their needs and under favourable conditions.

Our Broker Network

The MMQ has teamed up with *FQM Assurances Inc.* who has agreements with a network of insurance brokerage firms. Thanks to the presence of these firms across Québec, all mutual members can enjoy the benefit of coverage that is fully adapted to their needs, while having privileged access to the best possible guidance and advice in effective risk management.

Our Values

The MMQ's decisions and actions are guided by the following six values: transparency, respect, dynamism, equity, excellence and openness.

Our Governance Philosophy

The mutual members' fundamental authority

The philosophy underlying governance at MMQ rests upon the fundamental authority of its mutual members. The mutual members grant to the MMQ its legitimacy and its authority for which the board of directors must render an account of results.

Principles

In keeping with the mutualist culture, the philosophy of governance at MMQ is founded upon compliance with legislative requirements, regulations and standards, while drawing its strength from models of democracy, transparency, efficiency and vigilance.

Integrity

MMQ demands of its directors, management team and employees unwavering commitment to honesty, integrity and fairness when they promote its services and conduct its overall business.

Sound financial management

To ensure its institutional dynamics and development, MMQ takes great care in looking after its decision-making procedures based upon sound financial management.

Risk management

Risk is evolutionary and is a factor of development. It is the mission of the board of directors to understand and approve strategies related to risk management, and it is up to the management to develop a dynamic and evolving environment, as well as appropriate policies and procedures.

TABLE OF CONTENTS

MMQ BECOMES THE *FONDS D'ASSURANCE DES MUNICIPALITÉS DU QUÉBEC*

La Mutuelle des municipalités du Québec (MMQ) is joining forces with the Fédération québécoise des municipalités du Québec (FQM) to become the Fonds d'assurance des municipalités du Québec (Fonds) as of January 1, 2022. This amalgamation will further solidify the services offered to municipal organizations while preserving their access to the insurance products they need to protect their activities, under the best possible conditions. Québec municipalities will continue to benefit from unparalleled municipal expertise in property and casualty insurance as well as loss prevention and claims.

MESSAGE

FROM THE CHAIRMAN OF THE BOARD

Mr. Jacques Demers

THE AMALGAMATION OF TWO ORGANIZATIONS: STRENGTHENED EXPERTISE AND IMPROVED SERVICES

Since its founding, *La Mutuelle des municipalités du Québec* (MMQ) demonstrates the need for collective action in order to benefit from an organization that can offer the Québec municipal world a group of expertise able to meet the challenges and confront the issues associated with the municipal insurance market. The relevance of this approach is more evident than ever as the global conditions of access to property and casualty insurance products have tightened.

Like the marketplace in which municipalities operate, the way we manage and organize to meet the issues we face must adapt and evolve to confront changing global conditions and growing challenges.

A few years ago, the first steps towards sharing certain aspects of the management of MMQ and the *Fédération québécoise des municipalités* (FQM) were already taken. Based on this positive experience and in order to face these challenges and continue to progress in our capacity to offer relevant and improved insurance services, the MMQ board of directors has decided to regroup these services within FQM. To do so, the board approved Bill 202 - *An Act respecting the insurer activities of the Fédération québécoise des municipalités locales et régionales and its amalgamation with, by absorption of, La Mutuelle des municipalités du Québec*, which was unanimously approved by MMQ members at the special meeting held on September 30, 2021. Then, on December 7, 2021, the bill was adopted by the *Assemblée nationale du Québec*, allowing the FQM to establish the *Fonds d'assurance des municipalités du Québec* (Fonds) to succeed, as of January 1, 2022, to the rights and obligations of MMQ.

All of our municipal and regional organizations in Québec will benefit from the combined expertise of our two strong and influential organizations.

Maintaining good governance

Throughout 2021, the board of directors and the management team continued to apply the same principles of governance and sound financial management. Committed to maintaining high quality governance, the new insurance fund will be overseen by a board of directors and a property and casualty decision committee separate from the FQM board of directors. As a result, the insurance business will now be overseen by a group of individuals consisting of five elected municipal officers, no more than two of whom are also members of the FQM board, and four independent directors chosen for their expertise in areas related to property and casualty insurance management.

In addition, following the respectable performance of MMQ in 2021 and on the recommendation of the audit and integrated risk management committee, the board of directors approved the payment of a \$1 million experience refund to eligible MMQ members.

This experience refund was made possible by sound management, which resulted in a net income after experience refund of almost \$3 million. The surplus after experience refund will be used to maintain a financial reserve to meet the ever-increasing number of municipal assets we insure.

MESSAGE

FROM THE CHAIRMAN OF THE BOARD

“The integration of MMQ into FQM will increase the synergy of our teams, whose mission is to support municipalities in the face of the challenges confronting them.”

Committees with enlightening actions

In order to meet the increased demands for technologies, the board of directors decided to expand the mandate of the information and communications technologies committee to provide oversight in this area. As a result, the board also decided to make it a standing committee under the governance program.

In addition, it was decided to combine the insurance and claims committees, whose mandates are complementary. This decision is intended to ensure consistency in underwriting and claims guidelines and equitable management of all files related to insurance operations.

A dedicated and committed team

In closing, and while the MMQ team is now formally integrated into the FQM team, I would like to emphasize the importance for our communities to benefit from a team of dedicated people with know-how that is put to work to support municipal organizations and the Québec's regions. More than ever in a context of renewed challenges, it is essential that our communities be able to acquire, in the appropriate fields, a shared expertise that will allow us to face these new issues.

In addition, I would like to thank all my colleagues on the board of directors, who wisely guide our work and put the development of our regions at the centre of each of their decisions.

In addition, I want to acknowledge the commitment of the committees members who ably support the board's decisions by contributing their expertise.

Finally, all these achievements would not be possible without the unfailing contribution of our employees who support our actions each and every day. Their daily commitment to Québec's regions is remarkable and will continue to make all the difference in the years ahead.

Jacques Demers
Mayor of Sainte-Catherine-de-Hatley and
Reeve of Memphrémagog RCM

MESSAGE

FROM THE GENERAL MANAGER

Mr. Sylvain Lepage

OBJECTIVE: SYNERGY!

The year 2021 has once again been marked by the pandemic. Despite this unusual context, the MMQ team continued its development and various project implementations while effectively supporting Québec municipalities.

The loss prevention department has considerably increased its number of interventions in the field thanks to a substantial gain in efficiency resulting from the implementation of new inspection software during 2020. This increased involvement with our policyholders has helped to identify many risks and prevent them before a loss occurs.

An amalgamation project that is taking shape

The year 2021 will have seen the realization of a major project aimed at amalgamating MMQ and FQM activities. Born of a lengthy reflection, the amalgamation was seen as the best way to achieve the goal of both organizations to develop in order to support municipal entities by offering services that are both timely and responsive to the challenges they currently face.

The creation of the *Fonds d'assurance des municipalités du Québec* (Fonds), which takes over the rights and obligations of MMQ, as well as the integration of the teams, is a project that will be implemented throughout 2022. To this end, all our employees are dedicated to making this consolidation a success.

A team that continues to gather strength

In 2021, MMQ's management team was enhanced by the addition of two accomplished directors, both of whom bring a diverse background of experience in the areas of property and casualty insurance operations and the legal aspects of claims management.

First of all, MMQ welcomed Kathleen Dubé who joins the team as Senior Director, Insurance Operations. Having worked for more than 25 years in the field of specialized insurance in Canada and abroad, Kathleen will put her knowledge of the insurance and reinsurance market at the service of the organization. Drawing upon her expertise, MMQ has tasked Kathleen with improving our product offering and overseeing the activities of FQM Assurances, an FQM subsidiary responsible for the distribution of MMQ products.

Louise Leclerc has joined the team as Senior Director, Legal Affairs and Claims. With a background in law and extensive management experience in various insurance sectors, Louise is among the players who participated in the creation of MMQ by helping the team set up the claims department in 2003. She is therefore the ideal person to lead this department and bring it to a higher level of efficiency.

An excellent financial situation

Regarding our results, the net loss ratio was on the rise, but no catastrophic loss affected MMQ's results in 2021. Combined with a mild spring and winter, this context allowed MMQ to post good results once again.

MESSAGE

FROM THE GENERAL MANAGER

“For a long time now, the priority of the teams of our various organizations has been synergy. By formally merging the MMQ and FQM teams, our objective is to more than ever build an organization capable of supporting the development of communities in all regions. This way, Québec municipalities will be able to rely even more on a professional team with unparalleled expertise in property and casualty insurance, prevention, and claims settlement.”

In fact, for the year ended December 31, 2021, gross written premiums were \$52.2 million, an increase of 8.2% over 2020. This growth is attributable to the loyalty of our policyholders, whose retention rate is over 99.9%; to the enrolment of 11 new municipalities and municipal organizations in 2021; and to the revision of our rate structure to bring it in line with market conditions.

The net result is nearly \$4 million for the year ended December 31, 2021, of which \$1 million will be paid directly to members in the form of an experience refund. The surplus, or comprehensive income attributable to mutual members, is added to members' equity, which stands at \$42.6 million at year-end.

Rest assured that the directors and the management team continue to apply prudent management of this capital to guard against economic uncertainties and climatic disruptions that affect the entire global insurance market.

On the road to implementing a new insurance operations management system and the IFRS 17 standard

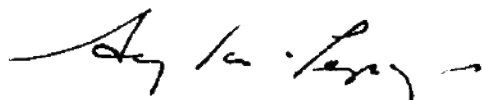

The team has pressed ahead with its technology transformation plan, continuing its preparation to implement a new insurance operations management system, with the goal of an operational rollout in the summer of 2022. This new software, which will change the way our teams and brokers work, will help us become nimbler and more efficient in handling our ambitious projects.

The project involves continuous collaboration between our different teams, our brokers, and our software supplier, a working synergy that allows us to anticipate with confidence and enthusiasm the implementation of our new insurance management system.

In addition, like the rest of the insurance industry, we will be required to adopt the IFRS 17 standard in our January 1, 2023 financial statements. Our finance team is currently assessing the impact of this implementation, as the standard introduces significant changes to the way insurance contracts are presented. The board of directors and the management team will monitor the implementation of this standard throughout 2022.

A resilient team

Once again, I want to thank and acknowledge the resilience with which MMQ teams are approaching the changes and projects that have taken place in 2021 and will continue into 2022. Their sincere dedication to our regions is invaluable and contributes day after day to the success of our organizations. On behalf of the entire management team, I would like to thank them for their commitment and I am convinced that together we will continue to build a relevant organization that is in tune with the needs of our regions.

Sylvain Lepage

GOVERNANCE

Board of Directors

The board of directors is responsible for MMQ's governance. It directs and oversees the organization's activities so as to ensure that they constantly serve the best interests of mutual members. The board of directors also works to assure the financial health, sound governance and long-term development of the MMQ.

GOVERNANCE

Statutory Committees

Ethics, Governance, and Human Resources

The ethics, governance and human resources committee mandate is to ensure that the MMQ rigorously complies with the rules of ethics, professional conduct, and conflict of interest that it has set for itself based on the highest standards in this domain.

To this end, the committee has developed and implemented a governance program aimed at fostering a culture of democratic, effective, and ethical governance based on the MMQ's mission and values. It oversees compensation programs, working conditions, strategy, policies, and programs governing human resources management.

Members: Jacques Lefebvre (Chairman), Jocelyn Couture and Martin Dulac.

Audit and Integrated Risk Management

The audit and integrated risk management committee is responsible for reviewing the MMQ's financial statements and other financial information. It also assures that proper accounting and actuarial practices are respected and to monitor external audit activities. The committee is also mandated to analyze financial risk control and management mechanisms, and to ensure the effectiveness and respect of operational control measures. In addition, the board of directors has charged this committee to oversee the MMQ's investment practices.

Members: André Normandin (Chairman), Arthur Gobeil, Robert Sauvé and Louis-Georges Simard.

Advisory Committees

Insurance

The insurance committee advises management and the board of directors on the orientations to be adopted in terms of underwriting and claims. To this end, any changes to the underwriting parameters and filed rates are submitted to the committee and it is informed of any addition or cancellation of coverage offered by MMQ. It examines all changes affecting the policies and directives of the claims department. It also ensures that underwriting and claims files are managed in accordance with MMQ values.

In the event of a suspension of benefits or cancellation of coverage, the insurance committee reviews the files and ensures the fairness of the decisions rendered. Similarly, in the event of a claim settlement dispute or denial of coverage, it reviews the files and ensures the fairness of the decisions rendered.

Members: Martin Dulac (Chairman), Guy-Lin Beaudoin, Patrick Bousez, Yves Corriveau, Serge Dufresne, Michel Giroux, Jonathan Lapierre, Raymond Noel and Francis St-Pierre.

Mutual Members' Risk Management

The mandate of the mutual members' risk management committee consists of assisting senior management with the presentation of risk management orientations to the board of directors. To that end, the committee determines the subjects to be prioritized with respect to risk management, approves the training programs to be presented to the board of directors, and it proposes appropriate risk management tools. The committee also recommends the MMQ's level of intervention in legislative, regulatory, legal or other matters.

Members: Jaclin Bégin (Chairman), Jean-François Downing, Jean-Claude Dumas, John Emory, Louise Labonté and Guillaume Lamoureux.

Information and Communications Technologies

The mandate of the information and communications technologies committee is to provide management and the board of directors with recommendations regarding the MMQ's technological infrastructures in terms of investment, profitability, efficiency, security and quality. More specifically, the committee proposes strategic orientations related to technologies to be implemented, evaluates available technological options, and it validates and approves the information technologies master plan. The committee works with the objective to support the MMQ in its technological transformation initiative, while assuring the sustainability of its information technologies infrastructures.

Members: Jocelyn Couture (Chairman), Mario Alain and Éric Blanchard.

MANAGEMENT'S RESPONSIBILITY

**with respect to the presentation of
financial information**

The management of *La Mutuelle des municipalités du Québec* (MMQ) is responsible for the preparation and accurate presentation of its financial statements in accordance with International Financial Reporting Standards (IFRS).

In order to provide the most reliable and pertinent financial information, the MMQ maintains rigorous internal accounting and administrative control systems.

For its part, the audit and integrated risk management committee reviews the financial statements and any other financial information of the MMQ before they are presented to the board of directors. The committee also reviews the control and risk management mechanisms, and it ensures the effectiveness and respect of control measures. In addition, the committee oversees MMQ's investment strategies as well as the respect of accounting and actuarial practices and ensures that these are prudent and appropriate.

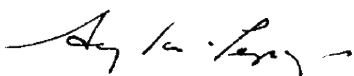

The MMQ's financial statements have been audited on behalf of mutual members by the external audit firm KPMG LLP in accordance with Canadian generally accepted auditing standards. Subsequent to a call for tenders, this firm was recommended by the board of directors and selected for the fiscal periods from 2019 to 2023 inclusively during the annual meeting of mutual members held in May 2019.

Policy and claims liabilities were certified by the appointed actuary, Mrs. Julie-Linda Laforce of the firm Axxima, in accordance with Canadian accepted actuarial practices. Mrs. Laforce was designated by the MMQ's board of directors at their meeting in April 2021.

The external auditors and appointed actuary had free access to the audit and integrated risk management committee. Upon completion of their audit, they presented the conclusions of their analysis to members of the committee.

After examination of the auditors' report, the audit and integrated risk management committee recommended approval of the financial statements by the board of directors of *FQM Assurances Inc.* and to the executive committee of FQM, which approved them at the meetings held on February 22, 2022.

The audited financial statements and related reports were then filed with the *Autorité des marchés financiers* (AMF).

Chief Financial Officer

INDEPENDENT AUDITOR'S REPORT

To the mutual members of *La Mutuelle des municipalités du Québec*

Opinion

We have audited the financial statements of *La Mutuelle des municipalités du Québec* (the Entity), which comprise:

- › the statement of financial position as at December 31, 2021;
- › the statement of comprehensive income for the year then ended;
- › the statement of surplus and of mutual members' shares for the year then ended;
- › the statement of cash flows for the year then ended;
- › and notes to the financial statements, including a summary of significant accounting policies

(Hereinafter referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Entity as at December 31, 2021, and financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the "**Auditors' Responsibilities for the Audit of the Financial Statements**" section of our auditors' report.

We are independent of the Entity in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Entity's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Entity or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Entity's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

INDEPENDENT AUDITOR'S REPORT

To the mutual members of *La Mutuelle des municipalités du Québec*

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- › Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- › Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Entity's internal control.
- › Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- › Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Entity to cease to continue as a going concern.
- › Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- › Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

KPMG LLP (signed)*

February 22, 2022

*FCPA auditor, FCA Public accountancy permit No. A110618

ACTUARY'S CERTIFICATE

I have valued the policy liabilities and reinsurance recoverable of *La Mutuelle des municipalités du Québec* for its statement of financial position at December 31, 2021 and their change in the statement of income for the year then ended in accordance with accepted actuarial practice in Canada, including selection of appropriate assumptions and methods.

I am satisfied that the data utilized for the valuation of these liabilities are reliable and sufficient. I verified the consistency of the valuation data with the insurer's financial records.

In my opinion, the amount of policy liabilities net of reinsurance recoverable makes appropriate provision for all policy obligations and the financial statement fairly presents the result of the valuation.

STATEMENT OF CASH FLOWS

For the year ended December 31, 2021, with comparative information for 2020

	2021 \$	2020 \$
CASH PROVIDED BY (USED IN)		
OPERATING		
Net income	2,989,409	6,361,934
Items not affecting cash:		
Depreciation of fixed assets	126,138	100,054
Amortization of intangible assets	21,218	70,714
Depreciation of right-of-use assets	80,241	95,472
Finance costs	13,422	18,500
	3,230,428	6,646,674
Reinsurers' share in the provision for unpaid claims and settlement expenses	22,925	(3,770,016)
Deferred commissions costs	(367,427)	(203,508)
Unearned premiums	2,449,473	1,356,725
Unearned ceding commissions	11,220	7,806
Provision for unpaid claims and settlement expenses	2,994,398	4,512,668
Interest earned	(1,081,718)	(1,374,444)
Finance costs paid	(13,422)	(18,500)
Change in non-cash operating working capital items (Note 19)	(3,542,799)	5,231,258
	3,703,078	12,388,663
INVESTING		
Acquisition of investments	(43,374,166)	(31,976,496)
Proceeds from the sale of investments	26,175,123	22,703,504
Interest received	1,309,918	1,347,645
Acquisition of fixed assets	(33,736)	(293,814)
Acquisition of intangible assets	(388)	(14,419)
	(15,923,249)	(8,233,580)
FINANCING		
Contributions from mutual members	1,100	800
Repayment of lease liabilities	(110,502)	(123,853)
	(109,402)	(123,053)
Net (decrease) increase in cash and cash equivalents	(12,329,573)	4,032,030
Cash and cash equivalents at beginning	18,711,479	14,679,449
Cash and cash equivalents at end	6,381,906	18,711,479

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

La Mutuelle des municipalités du Québec (hereafter referred to as «MMQ») was incorporated on November 17, 2003 under the *Cities and Towns Act* and the *Municipal Code of Québec*. In the normal course of its business, the core activities of MMQ consists in underwriting property and casualty insurance products («P&C») as well as assisting its mutual members in their own risk management. These mutual members are comprised of local and regional county municipalities and intermunicipal boards within the meaning of articles 465.1 of the *Cities and Towns Act* and 711.2 of the *Municipal Code of Québec*. The head office of MMQ is located at 7100 Jean-Talon Street East, Suite 805, Montréal, Québec, H1M 3S3, Canada.

Under the *Income Tax Act* (Canada) and the *Taxation Act* (Québec), MMQ is exempt from federal and provincial income tax as well as from the compensation tax for financial institutions. Expenses include goods and services tax and Québec sales tax where applicable. MMQ is not entitled to any input tax credits or input tax refunds.

On December 7, 2021, the *Assemblée nationale du Québec* adopted *An Act respecting the insurer activities of the Fédération québécoise des municipalités locales et régionales* (FQM) and its amalgamation with, by absorption of, *La Mutuelle des municipalités du Québec*, which authorizes FQM, a non-profit organization, to carry on the business of property and casualty insurance and, for that purpose, to establish an insurance fund. The *Fonds d'assurance des municipalités du Québec* (hereafter referred to as «Fonds»), governed by the *Insurers Act*, began its activities on January 1, 2022 and, as of that date, succeeded to the rights and obligations of *La Mutuelle des municipalités du Québec*. Like MMQ, its mission is to underwrite property and casualty («P&C») insurance products and to assist insured municipalities in their risk management. *Fonds's* assets constitute a division of FQM's patrimony, intended exclusively for its property and casualty insurance business. As of January 1, 2022, the FQM board of directors has delegated, except for a few matters reserved by law, the management of its property and casualty insurance business to *FQM Assurances Inc.* its wholly-owned subsidiary, and its property and casualty insurance decision committee. FQM's property and casualty insurance business is therefore overseen by a board of directors composed of nine directors; five elected municipal officers, only two of whom may also be FQM directors; and four independent directors in that they may not be elected municipal officers. All policies and practices regarding property and casualty insurance in effect at MMQ prior to the formation of *Fonds* remain in place.

The head office of FQM is located at 1134 Grande Allée West, Suite RC 01, Québec City (Québec) G1S 1E5, Canada, but FQM maintains an office for *Fonds* operations at 7100 Jean-Talon Street East, Suite 805, Montréal, Québec, H1M 3S3, Canada. Under the *Income Tax Act* (Canada) and the *Taxation Act* (Québec), *Fonds* is exempt from federal and provincial income tax as well as from the compensation tax for financial institutions. Expenses include goods and services tax and Québec sales tax where applicable. *Fonds* is not entitled to any input tax credits or input tax refunds.

In light of this Act, the financial statements of MMQ have been approved by the board of directors of *FQM Assurances Inc.* and by the FQM executive committee on February 22, 2022.

1. Role of the appointed actuary and the independent auditor

The appointed actuary is designated by the board of directors of MMQ. The appointed actuary is responsible for making sure that the assumptions and methods used for purposes of valuating policy liabilities comply with the recognized actuarial practices, the legislation in force, and any regulations or guidelines in this field. The appointed actuary must also express an opinion regarding the appropriateness of the policy liabilities as at the statement of financial position date with respect to the totality of obligations toward policyholders. This review, which seeks to verify the accuracy and completeness of the valuation data, as well as the analysis of the assets, are important elements to be considered when establishing his opinion.

Policy liabilities is made up of two components: the claims liability and the premium liability. The claims liability includes provisions for indemnifications, provisions for external and internal adjustment expenses, provisions for claims incurred but not declared as well as reinsurers' share in such settlements. The premium liability represents the costs that will have to be incurred to acquire the premiums.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

1. Role of the appointed actuary and the independent auditor (cont'd)

Following a call for tenders, the services of the independent auditor were retained by the mutual members at the time of the annual meeting. The engagement of the independent auditor consists in conducting an independent audit of the financial statements in accordance with Canadian generally accepted auditing standards. Within the context of this audit engagement, the independent auditor considers the work of the appointed actuary and his report on the policy liabilities of MMQ. The independent auditor's report indicates management's responsibility for the financial statements, the auditor's responsibility as well as his opinion on the financial statements.

2. Significant accounting policies

Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") and reflect the following significant accounting policies:

a) Basis of preparation

The financial statements, reported in Canadian dollars, have been prepared on a historical cost basis, as explained in the following accounting policies. Historical cost is generally based on the fair value of the consideration given in exchange for the assets.

b) Current and non-current classification

Assets expected to be realized and liabilities expected to be settled within MMQ's normal operating cycle of one year are typically considered as current. All other assets and liabilities are classified as non-current. The statement of financial position does not make a distinction as to the current or non-current nature of assets and liabilities. However, the following items are typically considered as current: cash, premiums receivable, accounts receivable, prepaid reinsurance premiums, reinsurers' share in claims and settlement expenses paid, prepaid expenses, deferred commissions costs, unearned premiums, unearned ceding commissions, accounts payable and accrued expenses and experience refund payable to mutual members. The following items are typically considered as non-current: fixed assets and intangible assets. The remaining items are comprised of both current and non-current amounts. The current and non-current portions of such balances are disclosed, where applicable, throughout the notes to the financial statements or within the risk management section.

c) Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents include cash and term deposits with maturities of three months or less from the acquisition date. As at December 31, 2021 and 2020, cash and cash equivalents consisted solely of cash.

d) Financial instruments

Financial assets and liabilities are recognized when MMQ becomes a party to the contractual provisions of the financial instruments. They are initially recognized at fair value and their subsequent measurement depends on their classification, as described below. Their classification depends on the nature and purpose for which the financial instruments were acquired or issued, their characteristics and the designation of such instruments by MMQ.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

d) Financial instruments (cont'd)

Cash	Loans and receivables
Investments – Term deposits	Loans and receivables
Investments – High-interest accounts	Loans and receivables
Investments – Capital shares	Loans and receivables
Investments – Bonds and treasury bills	Held-to-maturity
Premiums receivable	Loans and receivables
Accounts receivable	Loans and receivables
Reinsurers' share in claims and settlement paid	Loans and receivables
Accounts payable and accrued expenses	Other liabilities
Experience refund payable to mutual members	Other liabilities

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market or designated into another category and that are recognized at amortized cost using the effective interest method, less any impairment.

Held-to-maturity

Financial assets held to maturity are non-derivative financial assets with fixed or determinable payments and fixed maturities, other than loans and receivables, that MMQ has the positive intent and ability to hold until maturity. These financial assets are measured at amortized cost using the effective interest method, less any impairment.

Other liabilities

Other liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities.

Transaction costs

Transaction costs related to financial assets held to maturity, other liabilities, and loans and receivables are added to the carrying amount of the asset or deducted from the carrying amount of the liability and are then recorded in net income over the expected life of the instrument using the effective interest method.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

d) Financial instruments (cont'd)

Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts future cash receipts (including transaction costs, premiums and discounts earned or incurred) through the expected life of an instrument, to the net carrying amount on initial recognition.

Impairment of financial assets

Financial assets measured at amortized cost are tested for impairment at the end of each financial reporting period. The financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the assets have been adversely affected.

Objective evidence of impairment includes the following situations:

- ▶ significant financial difficulties of the issuer or counterparty;
- ▶ a breach of contract, such as a default in interest or principal payments;
- ▶ the increasing probability that the borrower will enter bankruptcy or any other financial reorganization;
- ▶ the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, assets that are assessed not to be impaired individually are collectively assessed for impairment. Objective evidence of impairment for a portfolio could include MMQ's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period as well as observable changes in national or local economic conditions that correlate with default on receivables.

The amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows taking into account guarantees and sureties, discounted at the financial asset's original effective interest rate. The carrying amount of the financial asset is directly reduced by the impairment loss for all financial assets.

If, in a subsequent period, the amount of the impairment loss decreases, and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through net income to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

d) Financial instruments (cont'd)

Derecognition of financial assets

MMQ derecognizes a financial asset when the contractual rights to the cash flows from the asset expire or when the financial asset and substantially all risks and rewards of ownership of the financial asset are transferred to another party. If MMQ neither transfers nor retains substantially all risks and rewards of ownership and continues to control the transferred asset, it recognizes its retained interest in the asset and an associated liability for amounts it must pay.

Derecognition of financial liabilities

MMQ derecognizes financial liabilities when, and only when, MMQ's obligations are discharged, cancelled or expire. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in net income.

Regular-way purchases or sales of financial assets

Regular-way purchases and sales of held to maturity financial assets are recorded on the trade date, which is the date on which MMQ commits to buy or sell the asset.

Offsetting of financial assets and liabilities

Financial assets and liabilities are presented on a net basis when there is a legally enforceable right to set off the recognized amount and MMQ intends to settle on a net basis or to realize the asset and settle the liability simultaneously.

Fair value

The fair values of cash, premiums receivable, accounts receivable, the reinsurers' share in claims and settlement expenses paid, accounts payable and accrued expenses, and experience refund payable to mutual members approximate their carrying amounts due to their short-term maturities.

e) Fixed assets

Fixed assets are held for administrative purposes. They are recognized at cost less accumulated depreciation and impairment losses. Depreciation is calculated based on their estimated useful lives using the straight-line method over the following terms:

Asset	Period
Leasehold improvements	Term of the lease
Furniture	10 years
Computer equipment	3 years

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

e) Fixed assets (cont'd)

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period. The impact of any change in estimates is accounted for on a prospective basis.

Derecognition of fixed assets

A fixed asset is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising from the disposal or retirement of a fixed asset is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in net income.

f) Intangible assets

Intangible assets with finite useful lives, which consist of software, and acquired separately are recognized at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives, which is a planned duration between three to seven years. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimates being accounted for on a prospective basis. Intangible assets begin to be amortized as soon as they are ready for use.

Derecognition of intangible assets

An intangible asset is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset (measured as the difference between the net disposal proceeds and the carrying amount of the asset) are recognized in net income when the asset is derecognized.

g) Impairment of fixed assets and intangible assets

At the end of each reporting period, MMQ reviews the carrying amounts of its fixed assets and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If such an indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of an individual asset, MMQ estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

The recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

g) Impairment of fixed assets and intangible assets (cont'd)

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in net income.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in net income.

h) Leases

At inception, MMQ assesses if a contract is, or contains, a lease based on whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

MMQ recognizes a right-of-use asset and a lease liability at the commencement date of the lease, i.e. the date the underlying asset is available for use.

Right-of-Use Assets

Right-of-use assets are measured at cost, less any accumulated depreciation and accumulated impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets are composed of:

- ▶ the initial measurement amount of the lease liabilities recognized;
- ▶ any lease payments made at or before the commencement date, less any lease incentives received, and any initial direct costs incurred.

Right-of-use assets are depreciated on a straight-line basis over the lesser of:

- i) the estimated useful life of the underlying asset; or
- ii) the duration of the lease.

The useful life of the underlying asset is determined on the same basis as that of fixed assets. They are assessed for impairment whenever there is an indication that the right-of-use assets may be impaired.

Lease Liabilities

Lease liabilities are initially measured at the present value of the lease payments that are not paid at the commencement date. The present value of the lease payments is determined using the lessee's incremental borrowing rate at the commencement date if the interest rate implicit in the lease is not readily determinable.

The incremental borrowing rate is a function of the lessee's credit risk, the nature of the underlying asset and the length of the lease contract. At the commencement date, lease payments generally include fixed payments, less any lease incentives receivable.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

h) Leases (cont'd)

Lease Liabilities (cont'd)

After the commencement date, the lease liability is measured at amortized cost using the effective interest rate method. In addition, the carrying amount of lease liabilities is reassessed when there is a change in future lease payments arising from a modification the lease terms and conditions. The reamasurement amount of the lease liabilities is recognized as an adjustment to the right-of-use asset, or in net income when the carrying amount of the right-of-use asset is reduced to zero.

Short-term leases and leases of low-value assets

MMQ has elected not to recognize right-of-use assets and lease liabilities for leases of low-value assets and short-term leases. MMQ recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

i) Balances related to premiums

i) Premiums and unearned premiums

Premiums are recorded when they are written and recognized on the statement of comprehensive income over the period covered by the insurance policy.

Unearned premiums represent the portion of written premiums relating to the period of coverage remaining at year-end.

ii) Deferred commission costs

Commissions associated with the acquisition of premiums are deferred and amortized over the term of the related policies to the extent that they are deemed recoverable, after taking into account related claims and costs as well as expected investment income.

iii) Unearned ceding commissions

Unearned ceding commissions are recognized as a liability according to principles compatible with the method used by MMQ to determine its unearned premiums.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

j) Balances related to claims

i) Provision for unpaid claims and settlement expenses

The provision for unpaid claims and settlement expenses is the estimate of the total future cost to settle all claims occurring before the closing of the financial statements, regardless of whether or not they were reported to MMQ. The provision for unpaid claims and settlement expenses has been established in accordance with the generally accepted actuarial principles under the standards set by the Canadian Institute of Actuaries. Since this provision is necessarily based on estimates, the final value may differ from the estimates. A provision for claims and settlement expenses is included for claims incurred but not reported based on past experience. The established methods for making these estimates are periodically revised and updated, and all adjustments are reflected in the year's results. These adjustments are attributable to events related to the final settlement of claims but which have not yet occurred and which perhaps may not occur for some time. These adjustments may also be caused by additional information concerning claims, changes in the interpretation of contracts by the courts or major variances in relation to historical trends in terms of the seriousness or frequency of claims. Consequently, claims and settlement expenses are recognized when incurred. A provision is determined for external and internal settlement expenses.

The nominal values of the claims liabilities estimated on a gross and net basis of reinsurance are based on generally accepted actuarial methods. The estimation process first determines the ultimate value of the benefits payable by accident year and by lines of business. From those ultimate values, the cumulative value of paid losses reported at the valuation date are deducted to determine the nominal value of the claims liabilities estimated. The estimated ultimate nominal value is obtained by estimating the claim development for the applicable line of business and year of accident. The discounted values of the claims liabilities estimated on a gross and net basis are determined by applying a discount rate to the estimated benefits payable in future years and a margin for adverse deviation. The reinsurance recoveries are calculated by subtracting the net claims liabilities to the gross claim liabilities.

When the undiscounted claims liability is established, it is adjusted to present value. The claims liability is discounted using a rate based on the rate of return of investments held by MMQ, from which a 0.25% margin is deducted. This discount rate is 1.70% excluding the interest rate margin at December 31, 2021 (1.90% in 2020).

Actuarial standards require that a margin for adverse deviation be considered to take into consideration the uncertainty level of the assumptions used. The rates used to establish the margins for adverse deviation as at December 31, 2021 vary from 5% (5% in 2020) for short-term risks, such as for property and automobiles, and 12.5% (12.5% in 2020) for long-term risks, such as civil liability, errors and omissions.

As mentioned previously, one of the methods used to established the claims liability is based on a loss ratio on the earned premiums. As at December 31, 2021, this ratio varies from 20% to 85% (20% to 80% in 2020) on a net basis.

ii) Reinsurers' share in the provision for unpaid claims and settlement expenses

The reinsurance amounts that are expected to be collected in relation to claims and settlement expenses are recorded as assets in accordance with the reinsurance contracts and based on principles consistent with the recognition of the provision for unpaid claims and settlement expenses. The margin for adverse deviation applied for reinsurance is 1% as at December 31, 2021 (1% in 2020).

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

k) Investment income

Interests earned on a financial asset are recognized when it is probable that the economic benefits will flow to MMQ and that the amount of revenues can be reliably measured.

Interests are recognized on a time basis, based on the amount of unpaid capital and the applicable effective interest rate.

Experience refunds declared by a financial institution and calculated on interest received are recognized when the right to receive such income has been established.

l) Experience refund to mutual members

Experience refund is presented in the statement of comprehensive income on the date that it is declared by the board of directors. At that time, experience refund is recorded as experience refund payable to mutual members on the statement of financial position. Experience refunds disbursed to mutual members that withdraw before the end of the eligibility period are deducted from the current period charge.

m) Use of estimates

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the year. Actual results could differ from management's best estimates. The most significant estimates are related to the determination of:

- ▶ the provision for unpaid claims and settlement expenses as well as the reinsurers' share;
- ▶ the estimated useful lives of fixed assets and intangible assets.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

n) Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimates, that management has made in the process of applying the accounting policies of MMQ.

Impairment of financial assets

At the end of each reporting period, MMQ determines if there is objective evidence of the impact of one or more events that occurred after the initial recognition of the financial assets on the estimated future cash flows of the assets. During the year considered, management determined that no such objective evidence exists.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

2. Significant accounting policies (cont'd)

n) Critical judgements in applying accounting policies (cont'd)

Held-to-maturity financial assets

Management has reviewed the financial assets held to maturity of MMQ based on its capital and liquidity requirements and has confirmed that MMQ has the positive intention and ability to hold these assets to maturity. The financial assets held to maturity are the municipal bonds, provincial bonds and treasury bills presented in Note 4.

3. Changes in accounting policies

New accounting standards and interpretations not yet applied

Applying IFRS 9 *Financial Instruments* with IFRS 4 *Insurance Contracts* (Amendments to IFRS 4)

On July 24, 2014 the IASB issued the complete IFRS 9 standard.

The mandatory effective date of IFRS 9 is for annual periods beginning on or after January 1, 2018 and must be applied retrospectively with some exemptions. The restatement of prior periods is not required and is only permitted if information is available without the use of hindsight.

IFRS 9 introduces new requirements for the classification and measurement of financial assets. Under IFRS 9, financial assets are classified and measured based on the business model in which they are held and the characteristics of their contractual cash flows.

The standard introduces additional changes relating to financial liabilities.

It also amends the impairment model by introducing a new 'expected credit loss' model for calculating impairment.

On September 12, 2016, the IASB issued amendments to IFRS 4, *Insurance Contracts* to address accounting mismatches and volatility that may arise in profit or loss in the period between the effective date of IFRS 9 and the new insurance contracts standard, IFRS 17 *Insurance Contracts*, issued in May 2017.

The amendments apply in the same period in which MMQ adopts IFRS 9 *Financial Instruments*.

The amendments introduce two approaches that may be adopted by insurers in the period between the effective date of IFRS 9, January 1, 2018, and IFRS 17, effective January 1, 2023:

- ▶ overlay approach: an option for all issuers of insurance contracts to reclassify amounts between profit or loss and other comprehensive income for eligible financial assets by removing any additional accounting volatility that may arise from applying IFRS 9;
- ▶ temporary exemption: an optional temporary exemption from IFRS 9 for companies whose activities are predominately connected with insurance. This exemption allows an entity to continue to apply existing financial instrument requirements in IAS 39 to all financial assets until the earlier of the application of IFRS 17 or January 1, 2023.

MMQ intends to exercise the permitted temporary exemption and to continue to apply the existing requirements of IAS 39 to all financial instruments until the expected effective date of IFRS 17, which is January 1, 2023. The extent of the impact of adoption of the standard has not yet been determined.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

3. Changes in accounting policies (cont'd)

New accounting standards and interpretations not yet applied (cont'd)

IFRS 17 Insurance Contracts

On May 18, 2017 the IASB issued IFRS 17 *Insurance Contracts*.

The new standard is effective for annual periods beginning on or after January 1, 2021. However, the IASB has tentatively decided to propose deferring the effective date to January 1, 2023. IFRS 17 will replace IFRS 4 *Insurance Contracts*.

This standard introduces consistent accounting for all insurance contracts. The standard requires a company to measure insurance contracts using updated estimates and assumptions that reflect the timing of cash flows and any uncertainty relating to insurance contracts. Additionally, IFRS 17 requires a company to recognize profits as it delivers insurance services, rather than when it receives premiums.

MMQ intends to adopt IFRS 17 in its financial statements for the annual period beginning on January 1, 2023 and is currently evaluating the impact of this new standard on its financial statements.

4. Investments

MMQ has negotiated conditions allowing it to obtain on its cash accounts a minimum interest rate corresponding to the prime rate minus 1.95%.

	Nominal Value	Fair Value	2021 Carrying Amount
	\$	\$	\$
HELD-TO-MATURITY			
Municipal and provincial bonds and treasury bills stipulated interest rates from 0.76% to 6.15%, effective interest rates from 0.54% to 3.55% and maturing from January 2022 to October 2028	17,794,464	18,201,488	17,926,047
LOANS AND RECEIVABLES			
High-interest account at variable rate currently bearing interest at 0.50% with no fixed maturity	11,040,166	11,040,166	11,040,166
Capital shares bearing interest at variable rates from 0% to 4.25% with no fixed maturity	2,000,000	2,000,000	2,000,000
Term deposits, including an annually redeemable balance, bearing interest from 0.54% to 2.70%, maturing from February 2022 to October 2023	42,691,410	42,691,410	42,691,410

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

4. Investments (cont'd)

	Nominal Value \$	Fair Value \$	2020 Carrying Amount \$
HELD-TO-MATURITY			
Municipal and provincial bonds, stipulated interest rates from 1.35% to 6.15%, effective interest rates from 0.65% to 4.10% and maturing from January 2021 to October 2028	26,309,387	27,079,601	26,453,391
LOANS AND RECEIVABLES			
Capital shares bearing interest at variable rates from 0% to 4.25% with no fixed maturity	2,000,000	2,000,000	2,000,000
Term deposits, including, an annually redeemable balance bearing interest from 0.64% to 2.40%, maturing from February 2021 to January 2023	28,118,134	28,118,134	28,118,134
	56,427,521	57,197,735	56,571,525

Hierarchy of recurring fair value measurements

Disclosures regarding financial instruments must be presented as a hierarchy that categorizes the inputs to valuation models used to value financial assets and liabilities. The hierarchy gives the highest priority to readily available unadjusted quoted prices in active markets for identical assets or liabilities and lowest priority to unobserved inputs. The three levels of the measurement hierarchy are described below:

Level 1: Fair value measurement based on unadjusted quoted prices in active market for identical assets or liabilities.

Level 2: Fair value measurement based on inputs other than quoted prices included in Level 1 that are observable in the market for the asset or liability, either directly or indirectly.

Level 3: Fair value measurement based on significant unobservable inputs that are supported by no market activity and incorporate management's best estimates.

The fair value of municipal and provincial bonds for which the market is not active is determined by independent valuation services that take into consideration the return or quoted price of financial instruments that have comparable conditions, such as quality, maturity and type of investment. Municipal and provincial bonds are classified at Level 2.

The fair value of high-interest cash accounts approximates the carrying amount since interest rates adjust depending on the market's interest rates variances.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

4. Investments (cont'd)

Hierarchy of recurring fair value measurements (cont'd)

The fair value of capital shares cannot be determined by using quoted prices from active markets for similar assets, either directly or indirectly. It is based mostly on non-observable market input and management's best estimates. Capital shares are classified at Level 3.

The fair value of term deposits approximates their carrying amount due to the weak interest rate fluctuations and their relatively short maturity.

There were no transfers between levels in 2021 and 2020.

5. Premiums receivable

In accordance with the provisions of an enforceable netting agreement, MMQ recognizes premiums receivable and commissions payable on a net basis. The gross amounts are as follows:

	2021	2020
	\$	\$
GROSS FINANCIAL ASSETS		
Premiums receivable	19,968,872	17,878,341
OFFSET FINANCIAL LIABILITIES		
Commissions payable	(2,995,331)	(2,681,751)
Net balance presented in the statement of financial position	16,973,541	15,196,590

6. Accounts receivable

	2021	2020
	\$	\$
Financial assets on a gross basis	455,878	571,133
Other receivables	39,725	50,881
	495,603	622,014

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

7. Claims and settlement expenses

The change in the provision for claims and settlement expenses as well as the reinsurers' share in the claims and settlement expenses included in the statement of financial position, together with its impact on the claims and settlement expenses shown in the statement of comprehensive income for the year are as follows:

	Gross \$	Ceded \$	2021 Net \$
Provision for unpaid claims and settlement expenses at beginning	53,342,512	21,924,125	31,418,387
Increase in estimated losses and expenses			
During the current year	28,241,462	4,488,419	23,753,043
During previous years	(2,192,754)	(1,192,868)	(999,886)
	26,048,708	3,295,551	22,753,157
Amounts paid for claims incurred			
During the current year	7,330,915	83,035	7,247,880
During previous years	15,723,395	3,235,441	12,487,954
	23,054,310	3,318,476	19,735,834
Provision for unpaid claims and settlement expenses at end	56,336,910	21,901,200	34,435,710

	Gross \$	Ceded \$	2020 Net \$
Provision for unpaid claims and settlement expenses at beginning	48,829,844	18,154,109	30,675,735
Increase in estimated losses and expenses			
During the current year	19,814,609	1,883,349	17,931,260
During previous years	7,373,154	6,907,177	465,977
	27,187,763	8,790,526	18,397,237
Amounts paid for claims incurred			
During the current year	5,552,267	13,131	5,539,136
During previous years	17,122,828	5,007,379	12,115,449
	22,675,095	5,020,510	17,654,585
Provision for unpaid claims and settlement expenses at end	53,342,512	21,924,125	31,418,387

Loss ratio sensitivity analysis

Given the use of a loss ratio in establishing the provision for unpaid claims and settlement expenses, as mentioned in the second paragraph of Note 2 j), a 5% increase or decrease in the expected loss ratio would result, respectively, in an increase or decrease in the net provision for unpaid claims and settlement expenses of approximately \$537,000 as at December 31, 2021 (\$509,000 as at December 31, 2020).

NOTES TO THE FINANCIAL STATEMENTS

17. Experience refund to mutual members

The payment of experience refund must be approved by the board of directors. In accordance with the experience refund policy, the amount of the experience refund is based on MMQ's historic performance and on the conclusions of the dynamic capital adequacy test prepared annually by the appointed actuary. This test allows MMQ to determine, most notably, whether it has the financial capacity to meet adverse situations while remaining financially viable.

The current context marked by COVID-19 and the extreme weather events affecting the entire insurance industry calls for caution. In order to maintain the solid financial position of MMQ, its board of directors has decided, at its December 14, 2021 meeting, to issue an experience refund of \$1,000,000 for the year ending December 31, 2021 (\$2,000,000 for the year ending December 31, 2020).

When an experience refund is paid, to be eligible, a mutual member must:

- ▶ be a mutual member of MMQ for four years no later than January 1 of the third year preceding the year in which the rebate is declared;
- ▶ maintain its insurance policy in force between the closing date of the financial statements and December 30 of the following year.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

17. Experience refund to mutual members (cont'd)

The method used for calculating each eligible mutual member's share is a two-step process:

- ▶ the first portion is distributed in proportion to the total underwritten premiums by eligible mutual members during a determined period;
- ▶ the second portion is based on the mutual member's contribution to the profitability of MMQ. The latter is established according to the insurance risk quality, which is evaluated upon the loss ratio for the corresponding period, which must be below a maximum threshold.

The portion of the experience refund attributable to mutual members that withdraw before the end of the eligibility period is presented separately in the statement of comprehensive income.

18. Mutual members' shares

Membership, initial contribution and rights

To become a mutual member of MMQ, a local or regional county municipality or an intermunicipal board must adopt a resolution in which it adheres to the Agreement under section 465.1 and thereafter of the *Cities and Towns Act* and section 711.2 and thereafter of the *Municipal Code of Québec* signed on April 3, 2003, which is deemed to form an integral part of the said resolution, take out insurance with MMQ and pay an initial contribution of \$100. The initial contribution is non-refundable.

Each mutual member has the right to be invited to any mutual members' annual assembly of MMQ, to attend such meetings, and to cast a vote on the basis of one vote per mutual member. The head of a mutual member's board may perform any duty within the board of directors of MMQ or one of its committees under the terms set out in By-law 1.1, subject to legislative provisions in force.

Annual contribution

The board of directors can set the amount of the annual contribution, as necessary. If no annual contribution is determined, the amount is considered to be zero.

Special contribution

The board of directors may order that a special contribution be paid, as necessary. This contribution is divided among the mutual members in proportion to the amount of the premium written by the mutual member and its agencies.

Suspension or expulsion

The board of directors may order the suspension or expulsion of a mutual member under the terms and conditions set out in By-law 1.1 of MMQ.

Withdrawal

According to the *Municipal Code of Québec* and the *Cities and Towns Act*, a mutual member may not withdraw MMQ within five years of joining MMQ.

In addition, a mutual member may not withdraw from MMQ without providing twelve months' prior notice to top management.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

18. Mutual members' shares (cont'd)

Withdrawal (cont'd)

A mutual member who withdraws from MMQ remains subject to any special contribution as determined by the board of directors within a period of two years following its withdrawal. If applicable, the contribution is based on the premium paid by this mutual member and its agencies prior to the withdrawal.

In all cases, the withdrawal of a mutual member must be approved by the *Autorité des marchés financiers* in accordance with the *Municipal Code of Québec* and the *Cities and Towns Act*.

	2021	2020
Number of mutual members	1,139	1,129
Contributions from mutual members	\$113,900	\$112,900

During the year ended December 31, 2021, 11 mutual members (8 mutual members in 2020) joined MMQ and 1 mutual member withdrew (1 mutual member withdrew in 2020).

19. Additional cash flow information

Changes in non-cash working capital items:

	2021	2020
	\$	\$
Premiums receivable	(1,776,951)	(929,749)

Accounts payable and accrued expenses	77,786	(190,482)
Experience refund payable to mutual members	(851,520)	1,824,440
	(3,542,799)	5,231,258

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

20. Commitments

MMQ is committed under lease agreements expiring no later than June 2024, to pay an amount of \$244,794 for the rental of premises. The following payments are expected to be made in the coming fiscal years:

Year	\$
2022	97,918
2023	97,918
2024	48,958

21. Contingencies

In the normal course of business, various claims are pending against MMQ. Such claims are often subject to much uncertainty and their outcome cannot be predicted. According to management, adequate provision has been made for these claims and their settlement should not have a significant adverse effect on MMQ's future operating results or financial position.

22. Capital management

MMQ manages its capital so as to comply with the capital adequacy requirements as required by the *Insurers Act* and its financial commitments to stakeholders in the settlement of claims. The regulatory capital differs from the mutual members' equity as stated in the statement of financial position owing to the fact that it is weighted according to the risk associated with the financial situation and insurance activities.

According to the *Insurers Act*, MMQ must maintain sufficient capital to ensure sound and prudent management practices. The *Autorité des marchés financiers* has issued a guideline that limits the minimum capital funds standard according to the minimum capital test (MCT), represented by the ratio of available capital over the minimum required capital (the solvency ratio).

The available capital corresponds to the mutual members' equity. The minimum required capital comes from the assessment of the financial assets and liabilities risk related to policies by the application of various weighting factors. The *Autorité des marchés financiers* has established the minimal MCT at 100%. Furthermore, the target MCT is set at 150% for Canadian property and casualty insurance companies. In order to reach its own objectives, MMQ has set its minimal target ratio at 200% (200% as at December 31, 2020).

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

22. Capital management (cont'd)

As at December 31, 2021 and 2020, the MCT is detailed as follows:

(in thousands of dollars)	2021	2020
	\$	\$
Total capital available	42,640	39,629
Total capital required	10,518	9,871
Excess capital	32,122	29,758
Result of MCT Measure	405%	401%

23. Risk management related to financial instruments and insurance risk

Risk management policies and objectives

In its normal course of business, MMQ is exposed to a variety of financial risks, namely credit, liquidity, interest rate, market, insurance and reinsurance risks.

The board of directors is in charge of understanding and approving the financial risk management strategies, and management is in charge of implementing these strategies. MMQ's goal with regard to financial risks management is to optimize the risk-return ratio within defined limits throughout all its activities. Risk control is carried out through the application of policies, strategies as well as sound and cautious management procedures that are blended into all of MMQ's operations.

The board of directors has created the following committees to identify, understand, communicate and manage MMQ's risk exposure: a statutory committee of ethics, governance, and human resources; a statutory committee of audit and integrated risk management; an insurance advisory committee; a mutual member risk prevention advisory committee; and an information and communications technologies advisory committee. MMQ adopted an integrated risk management policy so as to help in organizing and integrating upstream actions to be taken for all types of risk to which it is exposed, including financial risks. This policy has been updated in 2020 by the board of directors.

MMQ has an investment policy whose objectives are prioritized as follows: safeguarding of capital from risks of losses, safeguarding of capital against poor matching of its cash requirements, and optimizing return on investment within the set investment boundaries for each eligible investments. The investment policy is revised annually and updated if required by changing circumstances.

Financial risks

a) Credit risk

Credit risk arises from potential losses involving a borrower's or a counterparty's failure to fulfill its contractual duties when outstanding. A counterparty can be any person or entity whose cash resources or other valuable considerations are considered forthcoming in order to extinguish a liability or obligation owed to MMQ.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Financial risks (cont'd)

a) Credit risk (cont'd)

The credit risk also includes the concentration risk. The concentration risk arises when investments are made in entities with similar characteristics, or when a substantial investment is made in a single entity.

Based on the valuation performed by MMQ, cash, investments, accounts receivable, amounts receivable from reinsurers and premiums receivables are the main items that may represent a credit risk.

Cash

All cash is held in a financial institution with good standings in Québec and with an excellent credit rating. MMQ considers that the credit risk related to this financial institution is low. MMQ does not actively manage the concentration risk related to cash.

Investments

All term deposits, high-interest accounts and capital shares are held in financial institutions with a credit rating of A- or better. MMQ considers that the credit risk relating to these financial institutions is low.

To satisfy the objectives of its investment policy and comply with all applicable rules, MMQ favours investing in instruments whose credit risk rating is low. The investment policy makes it possible to acquire bonds issued or guaranteed by the federal, provincial or municipal government, with preference being given to Québec municipalities. In general, municipal and provincial bond issuers have no credit rating on the market, making it impossible to measure the credit risk of most issuers. The policy also allows for investment in term deposits, mutual or exchange-traded funds, deposit notes, treasury bills and capital shares.

For the year ended December 31, 2021, the bond portfolio is composed of bonds from Québec municipalities, provincial bonds, and treasury bills. For the year ended December 31, 2021, the bonds of five municipalities and treasury bills represent 54% of the bond portfolio (six municipalities and provinces represented 50% of the portfolio in 2020).

Accounts receivable

Accounts receivable are mainly comprised of interest receivable. The credit risk associated with interest receivable is the same as for term deposits, municipal and provincial bonds as well as capital shares.

Due from reinsurers

Failure on the part of reinsurers to fulfill their obligations could result in losses for MMQ. MMQ does business with more than one reinsurer, thereby reducing its concentration risk. In addition, all reinsurers with which it does business are certified with a credit rating of A- or better, which reduces the credit risk.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Financial risks (cont'd)

a) Credit risk (cont'd)

Premiums receivable

All of the premiums receivable are from *FQM Assurances Inc.*, which has been mandated by MMQ to distribute its insurance products throughout Québec. For the year ended December 31, 2021, premiums receivable totaling \$16,973,541 include an amount of \$2,840,439 for which *FQM Assurances Inc.* also acts as a broker. For the years ended December 31, 2021 and 2020, there were no outstanding premiums receivable.

Maximum credit risk

The maximum credit risk exposure associated with financial instruments is equivalent to the carrying amount of the financial assets presented in the statement of financial position.

b) Liquidity risk

The liquidity risk represents the possibility that MMQ may not be able to gather sufficient cash resources, when required and under reasonable conditions, to meet its financial obligations. The investment policy uses the timeframe established to settle claims in the dynamic capital adequacy testing to establish acceptable investment terms.

The liquidity risk for current financial items is low. Cash, premiums receivable, accounts receivable and the reinsurers' share in claims and settlement expenses paid are sufficient to allow MMQ to meet its financial obligations to settle accounts payable and accrued expenses and experience refund payable to mutual members.

The liquidity risk mainly relates to the provision for unpaid claims and settlement expenses, net of the reinsurers' share. The following tables present an estimate of amounts established for each settlement period and the matching of investment maturities, at nominal value. Investments with no maturity are presented under the column "Less than 12 months."

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Financial risks (cont'd)

b) Liquidity risk (cont'd)

	Less than 12 months	1 to 2 years	2 to 4 years	2021 More than 4 years
(in thousands of dollars)	\$	\$	\$	\$
Provision for unpaid claims and settlement expenses, net of the reinsurers' share (undiscounted amount)	15,808	5,901	5,668	4,529
Bonds	7,328	4,252	4,007	2,207
High-interest accounts	11,040	-	-	-
Capital shares	2,000	-	-	-
Term deposits	26,691	16,000	-	-
Total	47,059	20,252	4,007	2,207

In addition to investments, MMQ has a cash on hand balance that would enable it to pay the provision for unpaid claims and settlement expenses.

	Less than 12 months	1 to 2 years	2 to 4 years	2020 More than 4 years
(in thousands of dollars)	\$	\$	\$	\$
Provision for unpaid claims and settlement expenses, net of the reinsurers' share (undiscounted amount)	13,385	5,559	5,782	4,359
Bonds	12,175	5,818	6,109	2,207
Capital shares	2,000	-	-	-

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Financial risks (cont'd)

c) Market risk

Market risk occurs when the value of an investment fluctuates due to variances in market prices, whether those variances are caused by factors specific to the investment or its issuer, or by factors affecting all instruments traded in the market. MMQ seeks to minimize this risk by making investments whose market risks are low. The policy of MMQ is to hold on to its bond investments to maturity, thereby limiting market risk.

d) Interest rate risk

The interest rate risk occurs when interest rates fluctuate and negatively affect the financial position of MMQ, which occurs when market interest rates increase.

None of the investments made by MMQ are recognized at their fair value because all of the latter's investments are classified as loans and receivables or held-to-maturity investments. As a result, a positive or negative shifting of the rate curve would have no significant impact on the bottom line.

Information on the maturity of interest-bearing investments is presented in the Liquidity risk section in this note.

e) Interest rate sensitivity

When the time value of money is taken into consideration to establish provisions for unpaid claims and settlement expenses, an increase or decrease in the discount rate may result in a decrease or increase in the burden of losses and settlement expenses. Therefore, a 1% variance in the discount rate would have a \$638,000 impact on the provision for unpaid claims and settlement expenses as at December 31, 2021 (\$610,000 as at December 31, 2020).

Management estimates that an immediate hypothetical 1% parallel rise or decline in interest rates would respectively decrease or increase the fair value of bonds by approximately \$335,000 as at December 31, 2021 (\$512,000 as at December 31, 2020).

Insurance risk

MMQ was created to provide general insurance and manage risks for its mutual members as well as their agencies.

The risk in any insurance contract is the possibility that an insured event will occur, together with the uncertainty as to the value of the resulting claim. Due to the very nature of an insurance contract, this risk is random and therefore unpredictable. However, overall, these risks follow probability trends making it possible to manage insurance risks.

There are three possible types of insurance risks in the normal course of business: the product design and pricing risk, the underwriting risk and the claims settlement risk.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Insurance risk (cont'd)

Product design and pricing risk

The product design and pricing risk is the financial risk of losses related to insurance operations, namely, when commitments exceed those that were anticipated or when such commitments exceed the price that was set for such products.

MMQ is a niche market insurer specializing in the municipal sector. It has acquired insurance expertise in this sector for both insurance products and their application. Since its creation, the insurance committee has validated changes to underwriting parameters or the pricing schedule and submitted them to the board, as well as any additions, extensions or deletions of guarantees, therefore monitoring profitability.

MMQ's exposure to insurance risk concentration is mitigated by its portfolio diversification across the Québec province and various lines of business. MMQ is exposed to losses of a catastrophic nature and has protected itself from them by signing reinsurance treaties limiting the losses that could result from each event.

Underwriting risk

The underwriting risk is the risk resulting from the selection and acceptance of risks to be insured.

Under its statutes, MMQ's sole purpose is to insure municipal risks in Québec. This specialization provides greater stability and predictability, thereby reducing the anti-selection risk. Moreover, to minimize risks, insurance policies are underwritten in accordance with MMQ's management practices taking its risk tolerance and underwriting standards into account.

MMQ's products are available to local municipalities, regional county municipalities, inter-municipal boards and other municipal agencies allowed under its statutes.

The insurance products offered by MMQ include property, loss of income, civil liability and umbrella (Follow-form) liability, errors and omissions, automobile, crime, boiler and machinery, cyberrisk as well as drones for professional use.

The insurance portfolio is stable, with a retention rate of more than 99% since its creation. Notwithstanding the fact that a mutual member becomes a member for an initial five-year period, MMQ issues twelve months insurance contracts that are reviewed annually upon their renewal.

Following the initial five-year period, if a mutual member wishes to withdraw, a twelve-month advance notice must be provided to MMQ. These rules allow MMQ to invest substantially in risk management while also enabling it to acquire in-depth knowledge of each municipality being insured. Given its very high market penetration rate, MMQ underwrites a limited number of new business annually in accordance with the standards of MMQ as well as prices in effect.

In addition, the member risk management and insurance committee, chaired by a board member and composed of board members and external members, along with members of the management team, monitors underwriting activities and proposes changes to the underwriting standards to board of directors.

As mentioned previously, the underwriting risk is also mitigated by a comprehensive risk management program. All mutual members undergo periodic inspections and new risks are inspected upon request to enable underwriters to make informed decisions.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Insurance risks (cont'd)

Claims settlement risk

The claims settlement risk is influenced by the frequency and severity of claims as well as by the uncertainty in estimating future claims payments.

Property: In general, the most significant claims relating to property insurance involve fires, water damage and natural risks such as storms, floods and earthquakes.

As most fires in municipal buildings are electrical in origin, MMQ has implemented a thermographic analysis program for electrical panels as well as a building inspection program. Furthermore, mutual members benefit from training in fire and safety.

Loss of income: Given the nature of mutual members' activities, loss of income is not a major concern for MMQ.

Civil liability and umbrella (Follow-form) liability: Civil liability claims often involve a bodily injury suffered on city property, in particular after falling on a sidewalk or accidents taking place during events or recreational activities. Firefighting activities also result in a large number of claims. Due to climate change, environmental risks such as sewer backups and ditch overflows are likely to increase.

General civil liability-related risks are mitigated by the risk management program. MMQ offers its mutual members expert risk management advisors who go on-site to evaluate the premises, convey relevant standards and best practices, or to provide training on matters involving high or particular risks. Where firefighting activities are concerned, municipalities that have a fire safety cover plan, whose measures defined in their implementation plan were carried out according to the established schedule, are granted immunity under the *Fire Safety Act*. In addition, MMQ travels around the province to support mutual members in implementing their cover plan. As well, it has established a program to inform mutual members with respect to the application of the many legislative parameters relating to environmental management. A prevention program for recreational and sports accidents is made available to help mutual members plan activities and acquire specialized equipment, as well as to implement risk mitigation measures. Furthermore, MMQ offers its assistance for learning and applying best risk management practices so as to reduce claims related to the maintenance and repair of various municipal infrastructures, including roads, sewer networks, ditches, vehicle fleets and buildings. Finally, MMQ also offers its mutual members a free four-hour legal assistance service. The purpose of this service is to reduce claims by providing legal advice and support in certain targeted areas of law.

Errors and omissions: Most claims relating to errors and omissions result from alleged errors relating to the issuance of permits or the awarding of a contract being contested by certain bidders. MMQ mitigates these risks through its legal assistance service and a range of training courses given either by its specialized staff or in collaboration with municipal associations.

Automobile: This risk is rather low since, in Québec, automobile risk is limited to property. Bodily injuries are covered by government insurance.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Insurance risks (cont'd)

Claims settlement risk (cont'd)

Crime: Given the nature of mutual members' activities, theft is not a major concern for MMQ.

Boiler and machinery: In general, the frequency of equipment breakdown claims is low. Furthermore, the risk is offset by the inspection program implemented in accordance with An Act respecting pressure vessels and by the regular inspections carried out on other insured property.

Cyber risk: This optional protection covers fees related to an incident and losses incurred by the mutual members related to digital assets, business interruption and cyber extortion. It also covers civil liability related to network security, personal information protection and those linked to the media on the Internet in addition to fees related to regulatory procedures.

Drones for professional use: This optional protection covers drones for professional use in property and civil liability insurance.

MMQ prepares many publications on risk management, which are emailed to mutual members, posted on its website, or included in specialized magazines dedicated to the municipal sector. In addition, the training sessions offered by MMQ are given by webinar in order to reach the greatest number of mutual members and in person in most regions when the situation allows it.

Causes of uncertainty in estimating future claims payments

In addition to managing the underwriting risk resulting from the selection and acceptance of risk to be insured, the reserve valuation risk is monitored specifically. A major loss committee has reviewed the reserve changes for significant files and is analyzing them to determine what additional prevention measures can be put in place. Provisions for claims payable must be established as soon as the claim is reported. MMQ has set guidelines for reserves to which analysts refer daily. These reserves are valued individually for each case by the claims department. In addition to a regular follow-up, each file is reviewed annually by the department manager.

Although the department analysts spare no effort in preparing reliable financial data, this is not an exact science and surpluses or deficiencies in provisions may occasionally occur in spite of the control methods put in place to limit them. Moreover, insurers will always have to face changes in legal decisions, which can sometimes complicate the settlement of disputes as might be expected. Any significant loss is examined by the insurance technical committee.

Additional provisions for claims incurred but that have not yet been reported and provisions for claims that have arisen and been reported but for which inadequate provisions exist are also recognized.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

23. Risk management related to financial instruments and insurance risk (cont'd)

Reinsurance

The severity of claims is limited by reinsurance treaties in which, as a result, MMQ will bear up to \$835,000 (\$835,000 in 2020) on a net basis per event. Moreover, MMQ optimizes its reinsurance strategies to limit certain exposure.

Beyond this retention, excess, catastrophic, facultative and quota share loss treaties bring together the reinsurance capacity required for the operations of MMQ. It also holds additional limits by way of property and automobile catastrophe treaties.

Reinsurance operations do not relieve MMQ of its obligations toward policyholders.

To select its reinsurers, MMQ applies certain criteria as defined by its risk management policy for reinsurance. This policy provides selection criteria for both the reinsurers and the reinsurance broker chosen to represent it.

Moreover, MMQ does not use non-traditional ceded reinsurance treaties such as obligations in the event of a disaster.

24. Compensation of key management personnel

Compensation of key management personnel, i.e., the directors and management committee members, are detailed in the table below:

	2021	2020
	\$	\$
SHORT-TERM BENEFITS		
Management committee	1,250,919	1,156,409
Directors	134,912	62,035

NOTES TO THE FINANCIAL STATEMENTS

For the year ended December 31, 2021

25. Related party transactions

MMQ shares with the *Fédération québécoise des municipalités* (FQM) a number of employees who occupy management positions common to both organizations: general management, human resources and organizational performance, communication and legal affairs.

MMQ is also linked to FQM through various agreements regarding the legal assistance service, visibility and the full inclusion of MMQ in all FQM activities. Finally, MMQ sometimes uses services offered by FQM to Québec municipalities (e.g.: labor relations, lawyers, engineering). These services are paid accordingly to the rates applicable to municipalities which are FQM members.

These agreements amount to a cost of \$1,425,324 for the year ended December 31, 2021 (\$1,490,552 for the year ended December 31, 2020) and include the following:

	2021	2020
	\$	\$
Legal assistance services to mutual members	596,751	554,506
Partnership agreements, communications and public relations	596,751	554,603
Staff sharing	137,107	123,120
Consulting services	94,715	258,323
	1,425,324	1,490,552

In addition, on November 1, 2020, the FQM acquired the exclusive distribution rights for the MMQ's insurance products for the entire territory of Quebec, rights that had until then been owned by *Groupe Ultima*. This acquisition does not involve any additional cost for the MMQ but they will increase the value of the transactions between the two related entities. The acquisition also means that premiums receivable are now to be recovered from *FQM Assurances Inc.* Premiums receivable are recovered by MMQ within 45 days following the end of the month in which the transaction is recorded.

Commissions on written premiums totaled \$7,823,190 for the year ended December 31, 2021 (\$2,681,970 for the year ended December 31, 2020), while commissions on earned premiums included in earnings are as follows:

	2021	2020
	\$	\$
Commissions on earned premiums	6,487,058	67,154

NOTES TO THE FINANCIAL STATEMENTS
